(773) 931-0463 - [Github](#) - Chicago, IL
jerome0caruso@gmail.com - [Linkedin](#)

Languages: Javascript, CSS, Python, SQL, HTML, GIT

Frameworks and Libraries: React, Flask

Certifications: <https://eloquent-pasteur-b3c18a.netlify.app/#resume>

Portfolio: <http://www.jerome0caruso.com/>

PERSONAL APPLICATIONS

[Traduire] - Software Engineer

Technologies: HTML, CSS, JavaScript, React, Flask, JSON, MySQL, GIT

- Designed and developed a full-stack single-page CRUD web application(SPA), utilizing React, JavaScript, Flask and MySQL to create a language translation application with user authentication.
- Utilized Python and MySQL(sqlalchemy) with Flask to store, create, delete, and update users login and logout information as well as keep track of dynamic card notes/descriptions entered by the user.
- Utilized REST API design patterns with IBM Watson's language translation API.
- Created and designed page layouts in CSS, HTML, JSX and Bootstrap in React for the frontend UI portion of the project.
- Developed the application using React Router to create seamless transitions between page changes and dynamic content updates.
- Used ES6 features of JavaScript such as: Higher Order Functions, spread and rest operators, destructuring, arrow functions, async await and more.
- Launched the application to GitHub for version-control, while also making use of GitHub pages to build and host the application.

EXPERIENCE

Coding Temple - Software Engineer

09/2021 - Present

Technologies: HTML, CSS, JavaScript, React, Python, Flask, MySQL, GIT

- Designed and developed projects in HTML5, CSS3, JavaScript, Python and SQL to achieve working applications.
- Presented and described projects and code daily to review solutions and drive optimal working code.
- Constructed and tested multiple projects in HTML5, CSS3, JavaScript, Python and SQL.
- Engineer code to work through and complete white board algorithm challenges each day in Python and JavaScript.
- Programmed projects with weather, stats, IBM and various other Api's utilizing the documentation as well as using our own Flask Api to create dynamic CRUD applications.
- Responsible for regularly meeting deadlines each week to deliver readable, efficient working code.
